PRELIMINARY PROGRAMME
DESIGNING FOR UTOPIA OR DYSTOPIA?
PEOPLE AND PLANETARY HEALTH AT A CROSSROADS

W: www.healthycitydesign.global   |   E: info@salus.global
DESIGNING FOR UTOPIA OR DYSTOPIA?

PEOPLE AND PLANETARY HEALTH AT A CROSSROADS

Against a background of global climate change, healthier cities and communities are shaped by taking tough decisions on issues such as air quality, resilience planning, spatial strategies, working practices, active travel, sustainable homes and green spaces. How can we design a thriving, health-inducing future for all citizens – and avoid a dystopian alternative where our cities descend into crisis and chaos?

Making our cities more healthy, successful and sustainable for people to live, work and play in requires a co-ordinated interdisciplinary effort across a wide range of areas – from policymaking and governance to investment, planning and design. Progress in one area can be slowed or impaired by a lack of action or resolve in another.

As a result, the bigger picture around improving the health and sustainable development of our cities can be challenging and often overwhelming. Are we moving in the right direction or doing things now that will make matters worse down the line for both people and planetary health? How do we reconcile economic prosperity with the preservation of the natural planetary systems that sustain life? As Dr Howard Frumkin, head of the Our Planet, Our Health programme at the Wellcome Trust, told the Healthy City Design Congress in 2018, we should not be “mortgaging the health of future generations for economic growth in the present”.

The movement to develop healthier cities appears to be coming to a crossroads. On one hand, there is a utopian vision of urban change and renewal, with the green shoots of revival clearly evident in a host of policies and projects that support healthier lifestyles. In this scenario, walking, cycling and public transport addresses over-reliance on the car; effective resilience planning stops the spread of infectious diseases and mitigates the effects of climate change; flexible working strategies and environments reduce stress and improve productivity; and access to safe, affordable housing, green spaces and healthy local food underscore a commitment to community wellbeing. Technological advances and AI are safely integrated into our daily lives, enhancing city services, increasing efficiencies and creating intelligent environments, seamlessly converging with art and culture in the city to improve the quality of life for all citizens in a fair and equitable way. As a result, a significant burden is lifted off formal healthcare services.

The alternative vision is dystopian. In this scenario, indoor and outdoor air quality (already unacceptable in many cities, homes and workplaces) deteriorates further as cars clog up the roads; more than 500 cities are threatened with flooding, and many more with water shortages and heatwaves more intense than ever before; tensions rise between well-heeled business districts and areas of urban deprivation that circle them; ‘food deserts’ increase and green spaces are gobbled up by development. Healthcare services, in this scenario, start to collapse under exceptional pressure and demand.

In this, our third Healthy City Design International Congress, we’ll address the question of designing for utopia or dystopia. In a world where the effects of population migration and...
ageing play out amid rapid urbanisation, how can we support cities to take a healthier path? How can we ensure that, despite the best intentions of policymakers, urban planners, public health professionals, architects, designers and developers, our worst dystopian nightmares don’t come true. Environmentalist Sir David Attenborough’s impassioned plea to save our planet at the World Economic Forum in Davos, in January this year, effectively sketched out the destructive path we’re currently on.

**Bridging the gap between research, policy and practice**

Healthy City Design 2019 (HCD 2019) International Congress & Exhibition is a global forum for the exchange of knowledge on the research, policy and practice of designing healthy and sustainable cities and communities. Each day will open and close with keynote plenary sessions before splitting up into four streams (eight in total). Day one will focus on: urban design and placemaking; homes and neighbourhoods; work and workplace; and smart cities. Day two will cover: sustainable development; city planning and the public realm; place-based health; and mobility, travel and transport.

The event will also host a poster gallery of innovative research and projects, a knowledge-focused exhibition space, and an evening gala dinner.

**Organised by**

![The Helen Hamlyn Centre for Design, Royal College of Art](image)

**Keynote speakers**

Dr Audrey de Nazelle  
Senior lecturer, Centre for Environmental Policy, Imperial College London, UK

Mark W Johnson  
Founding principal, Civitas, USA

Dan Burden  
Director of innovation and inspiration, Blue Zones, USA

Dr Daisy Fancourt  
Senior research associate, University College London, UK

Dr Julia Jones  
CEO, Found in Music / Author, The Music Diet, UK

Session 6
Healthy and sustainable neighbourhoods
Chair: Janet Sutherland, The Academy of Urbanism, UK

10.45 Public housing and public amenities: achieving Sustainable Development Goal 11.7
Sridevi Rao, Landscape architect, Indian Society of Landscape Architects, India

11.05 Ruwais UN-planned: a public health and territorial intervention
Faris Abuzeid, Managing Director, Faris Abuzeid + Associates (FA + A), Saudi Arabia

11.25 Can affordable and sustainable housing be the keystone to social mobility? Progress one year on
Mike Nightingale, Founder, The Mike Nightingale Fellowship, UK
Elizabeth Petrovitch, Senior interior designer, IBI Group, UK
Barry Lewis, Director, Ubuhle Bakha Ubuhle / Beauty Builds Beauty, South Africa

11.45 A framework for a healthy neighbourhood: Establishing relationships between healthy behaviours and the social-environmental determinants of health
Denise Tan, Executive architect, Ministry Of Health, Office for Healthcare Transformation (MOHT), Singapore
Samantha Singham, Executive, Ministry Of Health, Office for Healthcare Transformation (MOHT), Singapore

12.05 Panel discussion

12.30–14.00 LUNCH, POSTER GALLERY AND EXHIBITION

12.40–13.50 Lunchtime workshop: Designing a healthy city: global perspectives on future living
Organised by: Ryder

For more details, please see page 16

Stream 2 begins at 10.45 in the Dorchester Library, after the day’s opening plenary session (08.45–10.15).

Session 7
Designing for mental health and wellbeing
Chair: Rhiannon Corcoran, University of Liverpool, UK

14.00 Urban planning factors and positive impacts upon mental wellbeing
Alexander Tully, Associate technical director, Arcadis, UK

14.20 Impact of design of urban dwellings on health and wellbeing
Parisa Kanabar, Architectural assistant, BDP, UK
Steve Marshall, Architect director, BDP, UK

14.40 How do front gardens impact health and wellbeing?
Lauriane Suyin Chalmin-Pui, PhD researcher, University of Sheffield, UK
Ross Cameron, Senior lecturer, University of Sheffield, UK
Alistair Griffths, Director of Science and Collections, Royal Horticultural Society, UK
Jenny Roe, Professor, Director, Center for Design and Health, University of Virginia, USA

15.00 Panel discussion

15.30–16.00 COFFEE, POSTER GALLERY AND EXHIBITION

Session 8
UK and international policy on healthy homes

16.00 Delivering healthy homes: influencing and shaping government policy and thinking
The All-Party Parliamentary Group (APPG) for Healthy Homes and Buildings’ White Paper ‘Building our future: laying the foundations for healthy homes and buildings’ makes a series of policy recommendations aimed at ensuring that the homes we live in, both new and old, positively contribute to our physical and mental health and wellbeing. This panel and workshop will explore and compare UK and international research and policy on creating healthier homes and buildings.

The APPG calls for better governance to join up all government departments and agencies responsible for health, housing and construction to ensure that health and wellbeing sit at the heart of housing provision. Evidence from the Healthy New Towns initiative shows that it’s possible to build quality new homes and communities with health and wellbeing at the forefront of delivery.

This workshop looks at the need for practice, which requires leadership not just from government but from industry too. The authors of the White Paper set out what they see as the challenges that lie ahead and delegates are invited to partake in this interactive session, with a view to highlighting best practice, examining success in other nations, and determining where industry can and should lead the way.

Panel:
Jade Lewis, Director of advocacy, Saint-Gobain UK and Ireland
Keith Ritchie, Executive chairman, Titon Holdings, UK
Stream 3 will begin at 10.45 in the Council Chamber, after the day’s opening plenary session (08.45–10.15).

### Session 9
**Inclusive workplaces: behaviour and biophilia**
Chair: Jane Ellery, Ball State University, USA

- **10.45** Designing in the age of anxiety – shaping space through affect
  Abbie Galvin, principal, director, BVN Architecture, Australia

- **11.05** Workplace loneliness: studies into various workplaces and design interventions
  Dr Trevor Keeling, Associate, BuroHappold Engineering, UK
  Rachel Edwards, Senior consultant, Lendlease, UK
  Helen Gowland, Head of workplace, Lendlease, UK
  Dr Nigel Oseland, Environmental psychologist and CEO, Workplace Unlimited, UK

- **11.25** Optimism in workplace design through biophilia
  Robert Hopkins, Regional director, AHR, UK
  Clive Constable, Commissioning director, Royal College of Physicians, UK

- **11.45** The role of landscape architecture in creating the biophilic workplace
  Joe Clancy, Senior landscape architect, WSP, UK

- **12.05** Panel discussion

### Session 10
**Briefing, measurement and performance**
Chair: Eve Edelstein, HxLab Perkins&Will, USA

- **14.00** The role of creative participatory briefing in strategic workplace design
  Aditya Aachi, Architect and Partner, Cullinan Studio, UK

- **14.20** Measuring the impact of health and wellbeing in the workplace
  Young Lee, Research associate, University College London, UK
  Derek Clements-Croome, Professor, University of Reading, UK

- **14.40** Power to the people: using pre- and post-occupancy evaluations to shine a light on actual design performance
  Harry Knibb, Associate, Sustainable Places team lead, WSP, UK

- **15.00** Panel discussion

### Session 11
**Light, sound and health**
Chair: Jeremy Myerson, Royal College of Art, UK

- **16.00** Exploring soundscaping options for the cognitive environment in an open-plan office
  Young Lee, Director, Innovative Workplace Institute, UK
  Elizabeth Nelson, Head, Learn Adapt Build, Netherlands
  Joshua S. Jackman PhD, Senior science consultant, ART Health Solutions, UK
  Mark J Flynn, Senior science consultant, ART Health Solutions, UK

- **16.20** A comparison of daylight and artificial lighting: the effects on subjective alertness, vitality and cognitive performance
  Chengpeng Zhao, PhD student, The Bartlett School of Environment Energy and Resources, UCL, UK

- **16.40** How to make cities sound healthier
  Jian Kang, Professor, University College London, UK

- **17.00–17.15** Panel discussion

---

Stream 3 will be brought to a close at 17.15, whereupon delegates are invited to return to the Wolfson Theatre for the day’s closing plenary session (17.15–18.00).
Stream 4 begins at 10.45 in the Sloane Room, after the day’s opening plenary session (08.45–10.15).

### Session 12
**Mapping and data: people, place and health**  
Chair: Blake Jackson, Stantec Architecture, USA

10.45 Session 20
Modern visions of the garden city
Chair: Marcus Grant, Cities & Health, UK
A new vision for Letchworth Garden City
Sarah Wigglesworth, Director, Sarah Wigglesworth Architects, UK

11.00 Gardenia: reimagining the garden city
Robert Delius, Divisional Director, Stride Treglown, UK

11.15 Nostalgia or utopia? The role of garden villages in delivering healthy communities
Geraint Hughes, Director, NEW masterplanning, UK
Andy Ward, Director, NEW masterplanning, UK

11.30 A systemic approach to healthy placemaking: reimagining the garden city
Prachi Rampuria, EcoResponsive Environments, UK
Soham De, EcoResponsive Environments, UK

11.45 Growing together: a productive framework for a circular garden city
Peter Gram Jorgensen, C.F. Møller Architects, UK

12.00 Panel discussion

12.30–14.00 LUNCH, POSTER GALLERY AND EXHIBITION

12.40–13.50 Lunchtime workshop: Taking action towards trans-disciplinary partnership working for planning inclusive and healthy places
Organised by Health Wellbeing Planning
For more details, please see page 17

14.00 Session 21
Urbanisation, active living & placemaking
Chair: Steven Ware, Art & Build, France
Challenges to providing active living infrastructure in England and Jamaica: a qualitative cross-cultural comparison
Anna Le Gouais, PhD researcher, University of Cambridge, UK

14.20 Study on the generation mechanism of Macao’s high-density built environment from the perspective of healthy urban design
Mingyu Chen PhD, Tsinghua University, China
Lan Chun Bian, Professor, Tsinghua University, China

14.40 Madinat al Irfan: a case study for the New Urban Agenda
Alfredo Caraballo, Partner, Allies and Morrison, UK
Nicholas Choy, Associate, Allies and Morrison, UK

15.00 Creating a sense of place through placemaking
Peter Ellery, Senior advisor, National Wellness Institute, USA
Jane Ellery, Assistant professor, Ball State University, USA

15.20 Panel discussion

15.45–16.15 COFFEE, POSTER GALLERY AND EXHIBITION

16.15 Session 22
Design for the public realm
Chair: Tarsha Finney, Royal College of Art, UK
The Nighttime Design Initiative
Joana Mendo, Architect and lighting designer, Joana Mendo | Lighting Design, Germany
Leni Schwendinger, Creative director and consultant creative director and consultant, NightSeeing, USA

16.35 Designing for active lives: contextualising toilet provision
Gail Ramser, Senior research associate, Helen Hamlyn Centre for Design, Royal College of Art, UK
Dr Jo-Anne Bichard, Senior research fellow, Helen Hamlyn Centre for Design, Royal College of Art, UK

16.55–17.10 Panel discussion

Stream 6 will be brought to a close at 17.10, whereupon delegates are invited to return to the Wolfson Theatre for the day’s closing plenary session (17.10–17.45).
### Session 23
**Community-based healthcare**  
Chair: Adrian Powell, NHS Property Services, UK  

<table>
<thead>
<tr>
<th>Time</th>

Stream 8 will be brought to a close at 17.10, whereupon delegates are invited to return to the Wolfson Theatre for the day’s closing plenary session (17.10–17.45).
POSTER GALLERY

P01 The community as a catalyst for healthier lifestyle
Jane Ellery (USA), Peter Ellery (USA)

P02 Engaging a wider public health workforce: bringing public health into architecture education
Rachael Marsh (UK), Paul Pilkington (UK), Elena Marco (UK), Louis Rice (UK)

P03 Exploring how neighbourhood design affects children’s experiences and use of their local area
Holly Weir (UK)

P04 Transformative learning to support caring places
Kirsty Macari (UK), Diarmaid Lawlor (UK)

P05 Reimagining a city’s assets and resources
Jane Ellery (USA), Sally Goerner (USA), Laura Torchio (USA)

P06 Designing the salutogenic city
Marcus Wilshere (UK), Richard Mazuch (UK)

P07 Acoustic performance planning and assessment protocols for open-plan offices: a case study in an open-plan office prototype lab
Young Lee (UK), Elizabeth Nelson (Netherlands)

P08 Inequalities in neighbourhood walkability for older adults
Razieh Zandieh (UK)

P09 What’s next? An analysis of Groningen’s ambitions and challenges to figure as a healthy city in the 21st century
Lara Caldas Fernandes da Silveira (Netherlands)

P10 Socially valuable: from opportunities to outcomes in the built environment
Michaela Packer (UK), Becci Taylor (UK)

P11 Flourishing cities
Derek Clements-Croome (UK), Marylis C Ramos (UK)

P12 Campaigning for lower speed limits as a catalyst for community regeneration
Rod King MBE (UK)

P13 A participative case study: changes required to transform urban community food growing in Dundee
Ness Wright (UK)

P14 Autism-friendly cities: a first set of spatial requirements to promote the urban capabilities of people with autism spectrum disorder
Valentina Talu (Italy), Giulia Tola (Italy)

P15 The tyranny of lifeless housing: reinstating integrated good practices for a secure future
Simran Singh (India)

P16 Reimagining a future world by humanising climate disaster
Tiandra Ray (USA), Peter Godart (USA)

P17 Research and practice for wellbeing in the workplace
Veronica Baroni (UK)

P18 Service design for homeless tuberculosis patients: peer-support network and pilot for inpatient rehabilitation / self-help capacity enhancement
Jisun Yang (South Korea)

P19 Challenged mobility
Anna Boldina (UK), Koen Steemers (UK)

P20 An exploration of the impact of oriental culture and its physical environment on present-day city suicidal prevention design in Seoul, Republic of Korea
Alex Harrington (UK)

P21 Healthcare at home: right size, right location
Mohammed Ul-Haq (UK), Neil Orpwood (UK)

P22 The plastic-free house
Harry Knibb (UK), Olga Turner Baker (UK), James Robb (UK), Fiona McGarvey (UK)

P23 Population influx: opportunity for salutogenic design
Maneka Kunder (USA), Darshita Gillies (UK), Jun Jia (USA)

P24 Health and wellbeing as a catalyst for whole-systems, place-based design
Paul Simkins (UK)

P25 Better workspaces – a holistic practical standard for temporary construction facilities
Dr Eva Gkenakou (UK), James Pay (UK), Maria Fernandez Cachafeiro (Canada), Paloma Algarra Resino (UK)

P26 Impact of urbanisation and sunlight exposure on cataract incidence: a population-based study in an Asian country
Chia-Hui Wang (Taiwan), Wan-Syuan Yu (Taiwan), Nai-Wen Kuo (Taiwan)

P27 Adopting the Scandinavian Sengetun model to design for end-of-life care
Alastair Forbes (UK), Oliver Jones (UK)

P28 Hospital and the city
Christine Nickl-Weller (Germany), Magnus Nickl (Germany)

P29 A net-zero carbon future: achieving ambitious energy demand targets in public-sector buildings
Alastair Forbes (UK), Oliver Jones (UK)

P30 Ecourbanism and healthy cities
Luke Engleback (UK)

P31 De-institutionalising long-term care for older adults in high-density environments
John Chye Fung (Singapore)
This workshop will bring together international projects and perspectives to discuss the challenges and opportunities facing future living from across residential, education, workplace, healthcare and urban design sectors.

Discussion will focus on how changing behaviours, technology and economic models are influencing how we are likely to live and work in the future. There will also be discussion on the key challenges that those involved in the design of future healthy cities will need to address.

Work sits at the core of contemporary societies, shaping much of our lives, structuring our buildings and our cities, catalysing the priorities of our life choices, and impacting strongly on our temporal and physical identities. Indeed, the workplace is the subject of profound transformations, challenged by the blurred confines brought to the fore by the digital revolution, the expectations of permanent connectivity, the increasing interpenetration between professional, social and family timeframes, the flexibility of working hours and conditions, etc.

New forms of work types are also emerging, changing the requirements for working conditions that have dominated the workplace for several decades. This has a direct and indirect impact not only on the principles by which workplaces operate (e.g., energy use) but also on occupants’ physical, physiological and psychological comfort, wellbeing and health. In fact, the conditions conducive to energy performance, human comfort and health can, at times, be substantially different, while the combination of physical parameters that are considered conventionally to support task performance might, in the long run, be to the detriment of sustained health and wellbeing.

This workshop aims to catalyse discussion on several interdisciplinary challenges that are necessary to grasp and address in order to design better, more comfortable, healthier, higher-performing and, ultimately, more sustainable and resilient workplaces.
Public engagement is based on the idea that those most affected by a particular project should be involved in that project. Initiatives are advanced with community partners rather than for or about them. The best-supported outcomes for built environment projects happen when relevant stakeholders have a role in confirming values, identifying and addressing challenges, and envisioning viable solutions together.

Agencies, elected officials, advocacy organisations, researchers, and those with complementary objectives are valuable partners in built environment interventions, and yet co-ordination across sectors and disciplines is often missing. It’s critical that stakeholders feel heard and understand how their input integrates into the full process, maximising the value of their participation, and ensuring both shorter-term outcomes and longer-term impacts. This workshop presents tools for advancing strategic engagement plans, including an impact framework for modelling your project, and choosing key performance indicators to monitor and measure success. Public engagement and impact planning examples from the United States and Ireland, and which illustrate levels of engagement to involvement, will be presented, along with lessons learned and best practices.

This session embraces the spirit of innovation and combines this with co-operation and mutual support around the broad agenda of healthy planning and places. For the first time, leading thinkers and doers on this agenda will come together to help build a critical mass of like-minded practitioners to improve public health spatial planning practice.

There is an inherent complexity in the way professions, sectors and parts of civil society operate to plan the places where we live, work and play, which has resulted in a number of different networks. This fragmentation can deepen a sense of silo-mentality within and across professions.

The workshop will be structured in a PechaKucha format, with each panelist/speaker providing short, punchy insights. These structured interjections from panelists will provide the necessary context and provoke positive structured contributions from all participants in working towards a collective pledge. This pledge will be a call to action from individuals or as a critical mass of like-minded practitioners to improve public health spatial planners, which the panel chair, with the congress organiser, will publish after the congress.

THE VENUE: A MODERNIST MASTERPIECE

Founded in 1518, the Royal College of Physician’s current headquarters is a Grade 1 listed building in Regent’s Park, designed by architect Sir Denys Lasdun and opened in 1964. Considered a modernist masterpiece, it is one of London’s most important post-war buildings. In 1992, Sir Lasdun was awarded the Royal Institute of British Architects’ Trustee Medal in recognition of his work at the RCP, considered to be “the best architecture of its time anywhere in the world”.

Sir Lasdun won the competition to design the new headquarters in 1959. He was surprised at being asked to design for such a traditional body, given his modernist philosophy, and he made it clear that he would not create a classical-style building.

DISCOUNTED ROOM RATES FOR DELEGATES

The Melia White House Hotel still preserves its architectural value as a prime example of late-1930s architecture, offering an eclectic style where contemporary and classic design meet.

After a recent refurbishment, this four-star hotel has 581 rooms, 112 apartments, nine meeting rooms, two restaurants and a bar with a terrace, a fitness centre, and an executive lounge. The hotel benefits from a prime central London location in Regent’s Park, within close proximity of London’s main attractions and a few minutes walk from the conference venue. The hotel is served by three underground stations – Warren Street, Great Portland Street and Regent’s Park – and main train stations including King’s Cross St Pancras and Euston Station.

Melia White House Hotel

Classic Single room with breakfast £180
Classic King room with breakfast £225 (double rate: £240)
Executive room all inclusive £270 (double rate: £285)

Executive includes executive lounge access. Rooms are also available without breakfast. All room rates are VAT inclusive.

On receipt of your registration, a website link will be provided to enable you to book your accommodation at the above rates. Please book early to avoid disappointment.
